

USING COMPOSTABLE BAGS

While the most sustainable option is to not use a bag, you can use a compostable bag in your kitchen pail or wheeled green cart.

Traditional plastic bags and bags that are biodegradable but not compostable will contaminate our composting facility! Instead, look for bags labeled **“home compostable”** or **“commercially/industrially compostable.”** You can also use paper yard trim bags and paper lunch or grocery bags.

TIP

INSTEAD OF USING A BAG, PLACE YARD TRIM OR UNCOATED PAPER PRODUCTS IN THE BOTTOM OF YOUR WHEELED GREEN CART TO KEEP IT CLEAN AND DRY.

For your kitchen pail, we recommend at least a 3-gallon bag to provide appropriate “folding slack.” For your wheeled green cart, use a bag that’s at least 33 gallons.
